

Teamcenter
Data Model Administration

course code TR25450
user level Intermediate
duration 3 days

The **Teamcenter Data Model Administration** course addresses configuration of the Teamcenter data model to meet your company's needs through the Business Modeler IDE. You will learn how to configure the Business Modeler IDE to extend the data model. Data model extensions covered in this course include creating business objects, properties, options, list of values, constants and rules.
